OCTOBER 2001

PRIME BEEF CATEGORY I TRAINING PROGRAMS

SYNOPSIS:

AFCESA/CEXR is making a concerted effort to update training products supporting the Prime BEEF category I home station training program. The intent is to provide a current video or CD-ROM product for each identified training requirement.

CATEGORY I TRAINING REQUIREMENTS:

Category I home station training requirements are outlined in attachment 2 to AFI 10-210, Prime Base Engineer Emergency Force (BEEF) Program. There are over 60 training requirements specific to engineer forces identified. Several more applicable to our mobility teams and personnel, levied and

taught by other base agencies, are also included.

For several years AFCESA/CEXR has been developing multimedia programs supporting home station training in an attempt to provide uniform, consistent training information and materials. Over 65 training videos have been fielded in the last 10 years covering engineer contingency procedures and equipment. About 80 percent of the engineer-specific training requirements now have an available training product.

NEAR-TERM GOAL:

Currently, we are updating existing products, particularly those sound-on-slide programs converted to video during the early 1990s. The Prime BEEF Home Station Training, Volume 1 CD-ROM is a direct result of the program conversion. It contains programs on Base Denial, Shoring, Immersion Heater, Airbase Security, and Wartime Construction Management. Four of these are new programs and one is an update. Other programs under development include expedient roads and culverts, field sanitation and hygiene, European utilities, expedient facility repair and a four-part program on

base planning and layout. These programs represent two new issues and three updates. Expect this CD after the first of the year.

ACCESSIBILITY:

Copies of these training packages will be mailed to each Civil Engineer unit as they are produced. Additional copies of these programs can be requested from:

HQ AFCESA/CEXR
139 Barnes Drive Suite 1
Tyndall AFB FL 32403-5319
DSN: 523-6442 FAX: 523-6383
Comm (850) 283-6442

Questions regarding this training package should be directed to the point of contact listed below. Check out the HQ AFCESA home page (<http://www.afcesa.af.mil/>) for information on other available readiness and contingency training programs.
